Barber, Budget & Co.

Gowns, Coats, Furs, &c.

Our stocks in our great department of Women's Ready-to-wear are entirely different from those shown earlier in the season. One needs to come here every day to keep in touch with all that is newest in women's wear. When others are reducing stocks we are adding to—which may appear incongruous—yet it is a fact.

Such a showing of fancy and tailored gowns, long and short coats, separate skirts, silk waists, furs, &c., was never thought of before; and such a demand for "Parker-Bridget" outfits never before existed.

A style seen here is indorsed by women of refinement and taste as being absolutely perfect and correct.

For they know it to be none other. And while the height of fashion (sensible, safe fashion) and quality are our first considerations—yet, price (fair price) is by no means the last. Our charges are always based upon worth.

Furs get a splendid showing here—and every piece is practical. While you may indulge your taste and fancy to the expenditure of a few hundred dollars for the finest Sealskin, Hudson Bay Sable, or Persian Lamb—at the same time you may also buy safely good furs here for very little.

Muslin Underwear, Corsets,

Hosiery and Handkerchiefs

In Our Little French Room.

Of course, when our representative was over in Europe last summer, picking out pretty bits of Lingerie, Christmas giving was in mind. It is necessary to plan months ahead in some lines.

The stock is radiant with richness and also complete in practicality. Which means—that your cultured taste and highest ideal relative to Lingerie may here be satisfied—also your practical ideas which comprehend garments whose cost is but a dollar or so. In Corsets we handle two of the most celebrated makes. The "Classique," of France. The "C. B.," of America.

The former is considered the highest art in Corset production. The latter, as you well know, is as comfortable and perfect fitting as any corset produced; shown here from \$1.00 up.

Handkerchiefs and Hosiery.

New arrivals give the showing more of a holiday air.

Prices? Never mind. Our word for it—that they're lower than will be found anywhere else for equal qualities.

BOYS' REFORM SCHOOL

Report of the President of the Board of Trustees.

THE PAROLE SYSTEM WORKING WELL

Better Results Have Been Obtained Than Heretofore.

ANOTHER BUILDING NEEDED

Col. Cecil Clay, president of the board of trustees of the reform school, in submitting his annual report to Attorney General Knox, says:

"At the beginning of the fiscal year there were in the school 192 boys; there were received during the year 148; a total of 340 as against 300 for the previous year. One hundred and twenty-three of those received were committed by the Police Court of the District of Columbia, eighteen by United States courts outside of the District, and one by the president of the board of trustees. Three boys who had escaped were returned.

"There were discharged during the year seventy-nine by order of the trustees, ten by expiration of sentence (United States courts), and one by pardon of the President of the United States. Six escaped and are still absent, and 7 were returned to the Police Court by its order, leaving in the school June 30, 1901, 237. There were no deaths during the year, and the general health of the inmates was good.

"The amount appropriated for salaries for the present fiscal year was \$16,450. The amount of the present estimate for salaries is the same. The amount estimated as necessary for the support of the school is the same as was appropriated for the present fiscal year and has been appropriated for a number of years past.

"The foundation for the additional boiler for the heating and power plant, for which Congress made an appropriation of \$3,000 at the last session, has been prepared, with the necessary accompaniment of brick work, and it is expected that the boiler will be installed ready for use before the beginning of cold weather.

Building and Repair.

"During the year such necessary repairs for the proper care and preservation of the buildings and personal property belonging to the school as the amount available under the appropriation for the support of inmates permitted were made, including those to the workshops, family buildings, barns, stables, fencing, sewers, roadway, steam plant, etc., in all of which work the boys were employed whenever practicable. The amount available for repairs each year is not sufficient to do everything that is required, and there is included in the estimates for the coming year an item of \$1,000 for making general repairs to all of the buildings needing them, and for painting them.

"The assembly hall, work upon which was going on at the date of the report, was completed and has been in use since May last. It is a well-designed and thoroughly well-constructed building, creditable both to the architect and the contractors, and its use is of great benefit to the school.

The Parole System.

"The parole system is working well and has already demonstrated the wisdom of Congress in making special provision for it.

"The school playgrounds have been regraded and are now in better condition than ever. Farm crops were not as good as usual, owing to the hot, dry season.

"Notwithstanding the amount of outdoor work and work in the shops done during the year, the hours of attendance in the school room have been more than usual and the results obtained better than heretofore.

"In the last report it was stated that 'the present maximum capacity of the school is 250 boys. If the number of white and colored boys is such as to utilize the present capacity for each.' The present report shows that the decrease in the number of boys in the school in 1898 and 1899 was temporary, the number in 1901 being even greater than in 1898. The general tendency being to increase with the growth of population. The school does not always have the same color line. At present the number of colored boys in proportion to white is much greater than usual. In last year's report the superintendent recommended the erection of another family building, but the trustees did not ask for one, nor have they included the cost of one in the estimates for the next fiscal year. It would be a good thing for the school and for the public service to erect another family building. The continued increase in the number of boys in the school and the disproportion between the colored and white alike call for this."

Superintendent Shallenberger's Report.

The report of George A. Shallenberger, superintendent, shows that the number of boys discharged during the year was 103 and the number received 148, as follows: By commitment from Police Court of District of Columbia, 123; by commitment from Supreme Court of District of Columbia, 3; by commitment from United States district courts, 18; by commitment from president of board of trustees, 1; by escapes returned, 3.

"The maximum number in the school during the year was 327, with a minimum of 192. Of the 148 received during the year the record of personal habits was as follows: Number having kept bad company and used tobacco, 74; number having a doubtful record, but coming from a good home, 21. Causes of commitment were: Assault, 10; indecent assault, 1; larceny, 58; vagrancy, 18; incorrigibility, 40; vagrancy, 1; housebreaking, 3; depredation on property, 2; violation of Federal laws, 12; passing counterfeit money, 3; disorderly conduct, 4; carrying concealed weapons, 2.

FEW JUVENILES SENT TO JAIL.

Annual Report Submitted by Warden Harris.

Warden Harris of the District Jail, in making his annual report to the Attorney General for the year ending October 31, 1901, says that:

"Since March 3, 1901, very few persons under the age of seventeen have been committed to the jail. All juvenile offenders under that age—with the exception of those under very serious charges—are now sent to the House of Detention, where there is no danger of their being thrown in contact with hardened and habitual criminals. During the year ending October 31, 1901, 232 persons under the age of seventeen were committed to the jail, some of whom were mere children.

"Notwithstanding the prevailing high prices for supplies for the jail during the present year, the warden believes the economy practiced will overcome these advanced prices, so that we may be able to keep within the appropriation for the same. During the past year the daily cost per capita for food for prisoners was 92.3 cents. During the fiscal year ending June 30, 1901, the daily per capita cost, including subsistence, repairs, forage, live stock, sanitary, advertising and printing, clothing, tobacco, fuel, stationery, convict stationery, fuel, light, officers' salaries, etc., was 344 cents, and the annual per capita cost was \$123.024.

"During the past year small sums of money have come into my hands from time to time from the sale of old barrels and bones and old roofing, aggregating the sum of \$100, which sum I have turned over to the United States treasury.

"Religious services are being conducted in the jail on each Sabbath by three distinct denominations, the Catholic, the Methodist and the Baptist. The morning hours of the colored Baptist Association holding services from 12 m. until 1 p.m., and the Wesleyan Church from 4 p.m. to 5 p.m. We believe these services are productive of good results, and in this connection we desire to thank all those who have taken such deep interest in the spiritual welfare of those who are confined in the jail, and to invite a continuance of these services."

REFORM SCHOOL FOR GIRLS

ANNUAL REPORT OF ITS PRESIDENT.

Health and State of Discipline Pronounced Good—Effect of Recent Legislation.

Henry M. Hoyt, assistant attorney general and president of the Girls' Reform School of the District, has submitted the following annual report to the Attorney General:

"The net increase in the number of inmates was from twenty-eight on July 1, 1900, to forty on June 30, 1901, this increase being due to the completion and occupancy of the new building. In that building the colored girls, who are and doubtless will be more numerous, are housed, and the old building, after necessary renovation, is now used for white girls, of whom two were received during the year. The plan of the school is that the two classes of girls shall be entirely separated in their living arrangements and work, although they are treated in identically the same way.

"The health and discipline good, and the state of discipline have been good. There has been no concerted insubordination, and individual instances requiring ordinary punishment have not passed beyond an extent which is to be expected.

"We find the new building, with its completed equipment, in most respects well adapted for its purpose. The particularly remarkable thing about the girls' dormitory rooms are controlled by an automatic locking device which works well, and that two modern fire escapes have been placed at proper points, and that there is an adequate provision of hose and fire extinguishers.

"During the year a revised scheme of discipline, daily work and fire drill has been adopted.

"The two buildings have now been connected as well as completed, by a substantial brick wall, which surrounds them both, giving separate yards, and by a brick corridor along the front wall which enables joint administration to be carried on. The outside appearance and condition of the property is gradually being brought up to a proper standard, now having the consequent on building is over and symmetrical grading can be done. The ordinary repairs required have been thoroughly looked after and a great part of the necessary work of this nature has been done by officers and employees of the school.

"We estimate that the appropriation for the next fiscal year should be the same amount for salaries, namely, \$6,386, and for maintenance, \$12,000—an increase of \$1,000.

Effect of Recent Legislation.

"We are fully convinced that the legislation of the past year affecting the school (31 Stat., 800), by reducing to seventeen years the age limit of commitment, and by granting to the board of trustees more specific power as to the employment, discipline and conditional or parole release of girls, etc., will permit of more effective work in the way of reform and will soon show satisfactory results. The act of March 3, 1901 (31 Stat., 1885), enlarges the powers of the courts and of the board of children's guardians respecting delinquent children under seventeen years of age, and in effect, since by the act, this school is one of the institutions which the courts and the board of children's guardians may and commonly do resort to in the respective manners pointed out by the law, for the care and custody of delinquent or incorrigible girls."

The Superintendent's Report.

The superintendent's report shows that July 1, 1900, there were present in the school twenty-eight girls; June 30, 1901, forty girls, ranging in age from eleven years to nearly twenty-one years. Twenty-five new girls have been received during the year, and three who had been apprehended during previous years had returned. These girls have been finally released at twenty-one years of age, seven have been returned to parents or guardians, and three have been placed in homes. The report also shows that during the year 3,411 garments were made in the school room.

The superintendent says: "The old building has been thoroughly renovated and repaired, and the new building, with its modern designs, to go tomorrow at 60c."

Smyrna Rugs, 69c.

Lot All-wool Smyrna Rugs in handsome patterns, suitable for parlors and bedrooms, to go tomorrow at 60c.

\$2.00 Blankets, \$1.39.

Lot of Heavy Wool Blankets, slightly soiled from handling; 11-quarter size; instead of \$2, for \$1.39.

GOV. JENKINS REMOVED

THOMAS B. FERGUSON APPOINTED TO SUCCEED HIM.

The President's Reasons for Changing the Chief Executive of Oklahoma.

The President has appointed Thomas B. Ferguson governor of Oklahoma, vice William M. Jenkins, removed.

In taking this action the President attached to the papers the following memorandum:

"Governor Jenkins of Oklahoma is hereby removed because of his improper connection with a contract between the territory and the Oklahoma Sanitarium Company. The decision is based purely upon his own written statements, and his oral explanations of them at the final hearing.

"One of the duties of the territorial governor is to enter into a contract with some person or corporation for the keeping of the insane of the territory. Governor Jenkins made such a contract with the Oklahoma Sanitarium Company, a corporation, the promoters of which reserved \$10,000 of its stock for the governor, and subject to his orders.

"In the governor's explanation of the affair, he says he told the promoters at the time they desired him to sanction the contract, that it was an important contract and that I have some friends whom I would like to have interested in the company, to whom I owed some political obligations which I would not be able to pay by an appointment or anything of that kind. The stock was delivered to a banker subject to the governor's orders, and was turned over to these friends whose political services the governor thus sought to reward.

"The extent of the favor to the governor or his friends is suggested by the fact that the only known sale of the stock since the contract was given out was at double the price paid for it."

"As performance of the contract was to be the whole duty of the corporation, it is obvious, either that the territory was obligated to pay far more than the service was worth, or that its helpless wards were to have the enormous profits contemplated taken out of their keep.

"The governor's confessed relations to the matter disclose such an entire lack of appreciation of the high fiduciary nature of the duties of his office as to unfit him for their further discharge.

"A sound rule of public policy and morals forbids a public servant from seeking or accepting any personal benefit in a transaction wherein he has a public duty to perform."

"A chancellor would not for a moment retain a trustee, who in dealings for the trust, reserved an advantage to himself. The thought is not to be tolerated that the President can be less vigilant and exacting in the public's interest."

(Signed) "THEODORE ROOSEVELT."
